*Information sur le niveau
d'émission de substances
volatiles dans l'air intérieur,
présentant un risque de toxicité
par inhalation, sur une échelle
de classe allant de A+ (très
faibles émissions) à C (fortes
émissions). Information as to
emissions of volatile compounds
in the indoor air, which might be harmful to the health when inhaled, on a scale
from Class A+ (very low emissions) to C (high emissions). Información sobre el
nivel de emisión de sustancias volátiles en el aire de espacios interiores, que
presentan un riesgo de toxicidad por inhalación, a una escala que va desde
clase A+ (emisiones muy débiles) a C (emisiones fuertes).

(1) La résistance thermique des revêtements de sol stratifiés Alsaflooring permet leur mise en oeuvre sur sols chauffants basse température, électriques PRE (Plancher Rayonnant Electrique) et PCR (Plancher Chauffant/Rafraichissant), sous réserve du respect du protocole de pose Alsaflooring. The thermal resistance of Alsaflooring laminate flooring allows it to be installed over low temperature underfloor heating, electric underfloor heating and underfloor heating/cooling, provided that the Alsaflooring installation protocol is followed. La resistencia térmica del suelo laminado Alsaflooring permite instalarlo sobre calefacción por suelo radiante de baja temperatura, calefacción por suelo radiante eléctrico y calefacción/resfrescante por suelo radiante, siempre que se siga el protocolo de instalación de Alsaflooring.
